## CLINICAL STUDY PROTOCOL

=====

AN OPEN LABEL, PROSPECTIVE, RANDOMISED, COMPARATIVE, TWO ARM CLINICAL STUDY TO EVALUATE THE EFFECTIVENESS OF GAMING PLATFORM - COSMA SOFTWARE FROM CEREBRUM MATTER LTD IN SUBJECTS WITH MILD DEMENTIA ASSOCIATED WITH MILD NEUROCOGNITIVE DISORDER AND ALZHEIMER'S DISEASE WITH EARLY ONSET.

# COSMA Clinical Study Protocol

## 1. PROTOCOL SYNOPSIS

<b>COSMA SOFTWARE ON EARLY ONSET DEMENTIA</b>	
<b>PROJECT NUMBER</b>	AHC/195/RDD/CR/EE/19
<b>PROTOCOL NUMBER</b>	AHC/PSY/051/19
<b>THERAPEUTIC AREA</b>	Psychiatry
<b>SPONSOR</b>	Cerebrum Matter Limited, UK
<b>CRO</b>	Aurous HealthCare R & D India Pvt. Ltd., India.
<b>SCIENTIFIC TITLE</b>	An Open Label, Prospective, Randomised, Comparative, Two Arm Clinical Study to Evaluate the Effectiveness of Gaming Platform - COSMA Software from Cerebrum Matter Ltd in Subjects with Mild Dementia associated with Mild Neurocognitive Disorder and Alzheimer's Disease with Early Onset.
<b>PUBLIC TITLE</b>	Clinical Study to Test Effectiveness of Gaming Software (COSMA) in Patients with Mild Dementia
<b>INDICATION</b>	Mild Dementia associated with Mild Neurocognitive Disorder (MND) and Alzheimer's Disease (AD) with Early Onset.
<b>CLINICAL PHASE</b>	N/Ap. Proof of Concept
<b>TYPE OF STUDY</b>	Non-Interventional, Device Based Study.
<b>INVESTIGATORS</b>	Neuro-Psychologists, Psychiatrist and/or Neurologists
<b>CDSO APPROVAL</b>	Not Required.
<b>TREATMENT DURATION</b>	28 days for each enrolled subject.
<b>STUDY POPULATION</b>	Adult subjects between 40 and 65 years (both ages and sexes inclusive) with Mild Dementia associated with Mild Neurocognitive Disorder and Alzheimer's Disease with Early Onset.
<b>STUDY DESIGN</b>	An Open Label, Prospective, Randomised, Comparative, Two Arm Clinical Study

# COSMA Clinical Study Protocol

<p><b>STUDY AIMS</b></p>	<ol style="list-style-type: none"> <li>1. To evaluate whether a software based Gamified Platform can support cognitive and mood improvement in clinically demented patients; MND and early AD.</li> <li>2. To investigate whether brainwaves (measured via EEG) while using the sponsor’s software COSMA, would impact executive functions and motor responses in MND and early AD.</li> <li>3. To improve the behavioral and psychosocial well-being in MND and early AD patients via our software (COSMA), using a scientific pathway (brainwave patterns) and understand the impact of the designed software that has on individuals with dementia.</li> </ol>
<p><b>STUDY OBJECTIVES</b></p>	<ol style="list-style-type: none"> <li>1. To assess and quantify changes in mood (psychological effect), executive functions (cognitive effect), behaviour and well-being in MND and early AD (to evaluate the differences in the above between pre and post-testing).</li> <li>2. To assess increase in alpha waves and parietal &amp; frontal lobe activation in EEG.</li> </ol>
<p><b>INCLUSION CRITERIA</b></p>	<ol style="list-style-type: none"> <li>1. Adult subjects between 40 and 65 years (both ages and sexes inclusive) with Mild Dementia associated with Mild Neurocognitive Disorder and Alzheimer’s Disease with Early Onset.</li> <li>2. Subjects with Clinical Dementia Rating (CDR) of <math>\leq 1.0</math> at the time of enrollment.</li> <li>3. Subjects with Mini-Mental State Exam Score between 18 -23 at the time of enrollment.</li> <li>4. Subjects who are educated, able to read and write English fluently</li> <li>5. Subjects who can a computer/similar electronic device with minimal supervision.</li> <li>6. Subjects who have a computer and an active high speed internet connection at home.</li> <li>7. Subjects with a dedicated LAR or caretaker to address any study objectives in lieu of the subject.</li> <li>8. Subject/LAR who is willing to give informed consent for participation, able to comprehend and understand the responsibilities during treatment period and follow up period.</li> </ol>
<p><b>EXCLUSION</b></p>	<ol style="list-style-type: none"> <li>1. Subjects with mental illness and/or neuropsychiatric disorders.</li> </ol>

# COSMA Clinical Study Protocol

<p><b>CRITERIA</b></p>	<ol style="list-style-type: none"> <li>2. Subjects who are on anti-depressants, anti-psychotics and/or medication that may cause worsening in cognitive functions.</li> <li>3. Subjects with significant primary visual impairments.</li> <li>4. Any significant medical condition (e.g., significant psychiatric or neurological disorders, active alcohol/drug abuse, etc.), any medical condition that is unstable/poorly controlled or other factor (e.g., planned relocation) that the Investigator felt would interfere with study evaluations and study participation.</li> <li>5. Subjects who have participated in any clinical study within 3 months from the date of enrolment.</li> <li>6. Females who are pregnant or lactating or planning to become pregnant during the study period.</li> <li>7. Subjects who mentally unable to comprehend the responsibilities and adhere to the stipulations of the protocol.</li> <li>8. Subjects, who in the opinion of the Investigator/CRMC are not eligible for enrolment in the study.</li> </ol>
<p><b>STUDY OUTCOME MEASURES</b></p>	<ol style="list-style-type: none"> <li>1. <b>Apathy Evaluation Scale:</b> Improvement from baseline</li> <li>2. <b>Trail Marking Test A :</b> Improvement from baseline</li> <li>3. <b>Trail Marking Test B :</b> Improvement from baseline</li> <li>4. <b>Dementia Severity Rating Scale:</b> Improvement from baseline</li> <li>5. <b>Abbreviated Mental Test Score:</b> Improvement from baseline</li> <li>6. <b>Clock Drawing Test :</b> Improvement from baseline</li> <li>7. <b>Lawson-Brady : Instrumental Activities of Daily Living (IADL) Scale :</b> Improvement from baseline</li> <li>8. <b>The Clinical Global Impressions Scale:</b> Improvement from baseline</li> <li>9. <b>EEG :</b> Improvement from baseline</li> </ol>
<p><b>STUDY END POINTS</b></p>	<ol style="list-style-type: none"> <li>1. <b>Apathy Evaluation Scale:</b> Reduction of <math>\geq 10</math> scores from baseline.</li> <li>2. <b>Trail Marking Test A:</b> Improvement of <math>\geq 5</math> seconds from baseline.</li> <li>3. <b>Trail Marking Test B :</b> Improvement <math>\geq 10</math> seconds from baseline</li> <li>4. <b>Dementia Severity Rating Scale:</b> Reduction of <math>\geq 5</math> scores from</li> </ol>
